

I support Satellite Radio!

I own my own business and travel quite a lot driving on our highways. Having my XM Satellite Radio has become incredibly valuable to me and my business. It offers me instant access to all the information I need at any time, whether it's business and investing news from CNBC, news from CNN or MSNBC, weather from the Weather Channel, or just great music., I have all of it at the touch of a button without searching and most all of it is NOT available in a majority of the U.S.

Stay out of XM

Stay out of Satellite Radio
